Quarterly Newsletter

Volume 5, Issue 1

Spring, 2024

### The Connection Between Sales Tax and Economic Development

S ales tax revenue seems to be a bit of a mystery in our community. My goal is to provide a little history and information, and show the connection between sales tax and Economic Development.

### When you shop in Brenham, you pay 8.25% in sales tax

My research shows that taxing goods started 4,000 years ago in Ancient Egypt, but really took on a new life in Rome with Julius Caesar. Although Texas had a sales tax for limited items, it wasn't until 1961 when the first broad-based tax was enacted. This general sales tax, currently at 6.25% for State revenue, became the foundation of the Texas tax system. Municipal sales tax began in 1967, and currently, the maximum local rate is 2.00%.

When you shop in Brenham, you pay 8.25% in sales tax. This is the breakdown:

<u>renham, TX</u>	
6.25%	
.50%	
1.50%	
8.25%	
	6.25% .50% 1.50%

In 1995, Brenham sales tax was 1.00%, but voters approved taking an additional .50% which is broken down as .125% to use for property tax relief and .375% to use for economic development (Type B) activity.

That .375% is managed by the Brenham Community Development Corporation (BCDC) and funds from this amount are dispersed as follows:

35% Economic Development

65% Community Recreation

Those percentages may seem low, but they translate into millions of dollars.

#### Sales Tax Revenue Over The Years (Charts on page 3)

City of Brenham	
2021	\$7,965,560
2022	\$9,156,877

Remember I said that the City used .125% for property tax relief? Well, in 1988, Washington County voters approved .50% sales tax for property tax relief too.

Property tax relief is REAL and you can find it on your property tax statement!

On the sample statement above, this tax-

payer saved a total of \$359.52.

The City of Brenham uses their portion of sales tax and property tax as revenue for the general fund to pay for city services. Washington County gets the majority of their revenue from property tax to fund county services, but uses the sales tax purely for property tax relief.

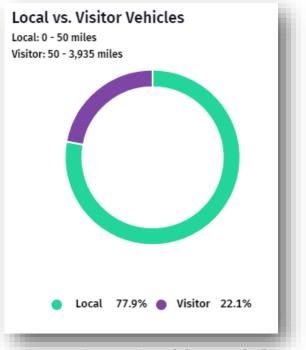

#### Continued from page 2

When you shop in Burton, you'll pay 8.25% in sales tax too. Their breakdown mirrors that of Brenham but the full 1.50% goes to city services.

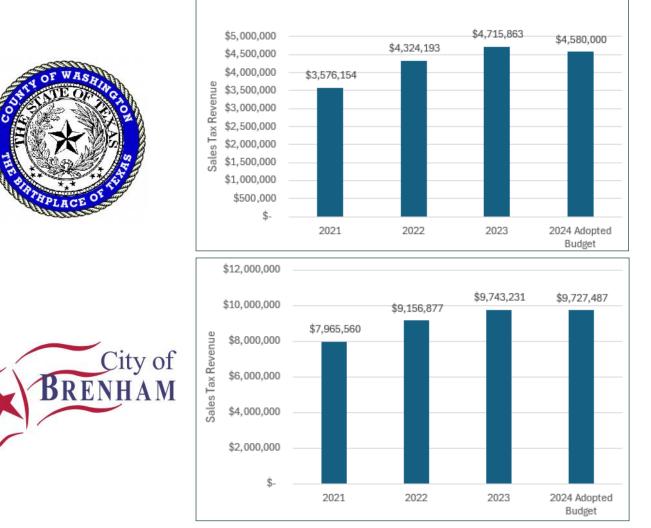

With new retail space getting filled, we expect that revenues will continue to increase.

### Local Sales Tax Revenue Continues To Increase

The data we've received shows a lot of visitors coming from out of the area so they are helping to increase our sales tax revenue (see chart to the right). This is definitely something to watch!  $\diamond$

### **Economic Development Partner**

As an integral part of Washington County's thriving economy, the Chamber of Commerce is committed to fostering growth and prosperity within our community. One of the essential mechanisms for sustaining our local economy is the implementation of a sales tax. Sales tax plays a pivotal role in funding vital services and infrastructure projects that benefit all residents and businesses in our county. From maintaining roads and public transportation to supporting education and healthcare initiatives, the revenue generated from sales tax ensures that Washington County remains a vibrant and attractive place to live, work, and visit. Furthermore, a modest sales tax allows us to reduce the burden on property owners and provide a more equitable means of funding essential services. By spreading the responsibility across a broader base, we can ensure that everyone contributes their fair share towards the betterment of our community. We understand that no one enjoys paying taxes, but we firmly believe that the benefits far outweigh the costs. Together, we can continue to invest in the future of Washington County and build a prosperous environment for generations to come.

May God continue to bless you, your business, and your family,

ame Kan
